AssetMinder®
Enterprise asset management

MANAGE ALL ASSETS IN ONE APPLICATION

Drive decisions with real-time and predictive data from all your assets, devices and equipment. Automate actions using predictive methods to transform your business into an Industry 4.0 leader.

IMPROVE OPERATIONAL PERFORMANCE IN REAL TIME

PREVENTATIVE & PREDICTIVE MAINTENANCE

Reduces equipment and labour costs and saves lost production time. Increases safety, revenue and efficiency of employee time.

Since the very first industrial-strength machine was switched on for the very first time, plant executives have lied awake asking themselves the same questions:

How can I predict and prevent machine downtime? How can I tell which small issues will grow into big problems? How can I integrate communication between machines, departments, and people?

How can I increase machine safety and compliance? The industrial Internet of Things (IIoT)—often called the "fourth industrial revolution"—is creating new ways to solve these long-standing problems.

DECISIONS POWERED BY DATA

AssetMinder® is an asset management application with predictive analytics capabilities. This out-of-the-box, turnkey solution can be easily implemented into your current business processes to increase productivity throughout your entire organisation.

AssetMinder® Condition Monitoring

AssetMinder® Condition Monitoring transforms the remote monitoring of mission-critical, heavy industrial assets such as compressors, pumps, centrifuges and generators. With process measurements and machine learning capabilities, this AssetMinder® module helps maintenance managers and process engineers to significantly reduce costs by to predicting failure and reducing costly downtime.

- Locate all your assets
- Implement proactive maintenance or service
- Predict equipment failure
- Monitor the usage of the equipment
- Control Service Remotely
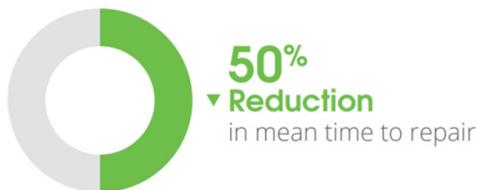

AssetMinder® Connected Product

AssetMinder® Connected Product is a module for Original Equipment Manufacturers and distributors who want to connect their product quickly and test a market opportunity.

- Disrupt competitors
- Offer your asset as a service and find new revenue streams
- Increase sales of consumables
- Increased customer satisfaction, contract renewals, word-of-mouth and customer referrals
- Increase your brand equity with outstanding service

WHY IT WORKS?

## Faster Service Delivery

50%
▼ **Reduction**
in mean time to repair

Reduced Cost Of Service

15-30%
▼ **Reduction**

Growth in Service Revenue

12-30%
▲ **Increase**

WHY ASSETMINDER® WORKS?

AssetMinder® directly impacts productivity, efficiency and business outcomes.

Our IoT solution was purpose-built to meet your KPIs by providing the right data, at the right time to the right person—so you can make operational decisions in real-time, with unprecedented visibility into health, usage and capacity of your assets.

![AssetMinder® Enterprise asset management]

HOW IT WORKS?

Disrupt your market, find new revenue streams and reduce operating costs quickly and with low risk.

OUT-OF-THE-BOX SOLUTION

AssetMinder® is an easy to deploy solution that can be self-installed and ready to capture data from any modern or legacy machine. AssetMinder® captures data from the edge though industrial grade Bluetooth sensors and robust Dell gateways. The application comes with a pre-configured, customisable, interface that enables easy importing and analysis of data.

CONNECT ANY AND ALL ASSETS

Other Industrial IoT solutions usually answer one question e.g where your asset is or what it is doing. They work well with one type of asset such as a vehicle, a generator or a building but never all of your assets. AssetMinder® allows you to connect and monitor any type of assets, equipment or devices, all in one application. This allows you to unlock levels of efficiency that haven't been possible before.

PREDICTIVE ANALYTICS

Data is only valuable when it enables you to make better decisions and take action. AssetMinder®'s Predictive Analytics capabilities analyse current and past behaviours to forecast future patterns and help make decisions or automate processes. This allows you to make more out of your assets and drive efficiency in all areas of your business.

READY TO SCALE

AssetMinder® seamlessly integrates with your current enterprise systems, therefore it is easily scalable across your whole organisation. This robust solution is ready to facilitate your future growth and enabling you to add multiple users, assets, and tennants.

CONNECT ANY ASSET AND DRIVE PERFORMANCE IMPROVEMENT

Your assets, equipment and devices are constantly generating data. How do you decide what to collect and how to use it?

LOCATE AND PROTECT ASSETS

Protect your assets against Theft and Violations or prepare for Audit

TRIGGER ACTION ON CONDITION

Get alerts when action is required to prevent downtime or unnecessary cost

PREDICT EQUIPMENT FAILURE

Identify failure modes across the fleet to avoid downtime and reduce risk of further damage

MONITOR EQUIPMENT USAGE

Check Warranty Claims, Comply with Health and Safety regulations

REMOTELY SERVICE

Remote access to perform diagnosis, provide guidance and send software and firmware updates

AUTOMATICALLY REPLENISH

Consumables automatically ordered direct from the manufacturer

Delight Customers
Benefit from increased customer satisfaction, contract renewals. Increase your brand equity with outstanding service.

Increase Revenue
Offer your asset as a service, increase sales of consumables.

SEE IT IN ACTION
