supplier
relationships

Managed Services

Knowledgeable client services and data teams here for your business

- 2 to 7 years experience across team
- Outsource management of complex supply chain projects
- Reduce administrative burden
- Learn platform best practice
- Valuable extension of your team

“The quality of service experienced from onboarding to everyday business as usual has been second to none with Authenticare. The team are extremely knowledgeable and adept at translating real-time supply chain data into truly actionable insight for our business. We already see them as a valuable extension to our team, without question.”

Scalable Supply Chain Solutions

SUPPLY CHAIN MAPPING

Map, monitor and visualise live supply chains across all tiers for complete transparency.

AUDITS & ASSESSMENTS

Create custom digital surveys to monitor compliance, manage risk and benchmark suppliers from anywhere in the world.

CERTIFICATIONS

Track live supplier certification status against key assurance schemes including Sedex and Global GAP to maintain standards.

PRODUCT SPECIFICATIONS

Build, manage and share complex product specifications across the supply chain to streamline processes.

DOCUMENT MANAGEMENT

Centrally store, share, organise and manage critical documentation, declarations and policies with supplier and internal teams.

INCIDENT MANAGEMENT

Collaboratively raise, monitor and resolve critical incidents across supply chains to prevent future issues.

KPIs

Manage and score supplier performance over time against key, custom metrics.

ANALYTICS & DASHBOARDS

Transform live data into actionable insight using standard and customised dashboards to inform decision-making.

ESG ASSESSMENT

Understand internal and supplier ESG performance using a standardised, validated assessment and scorecard.

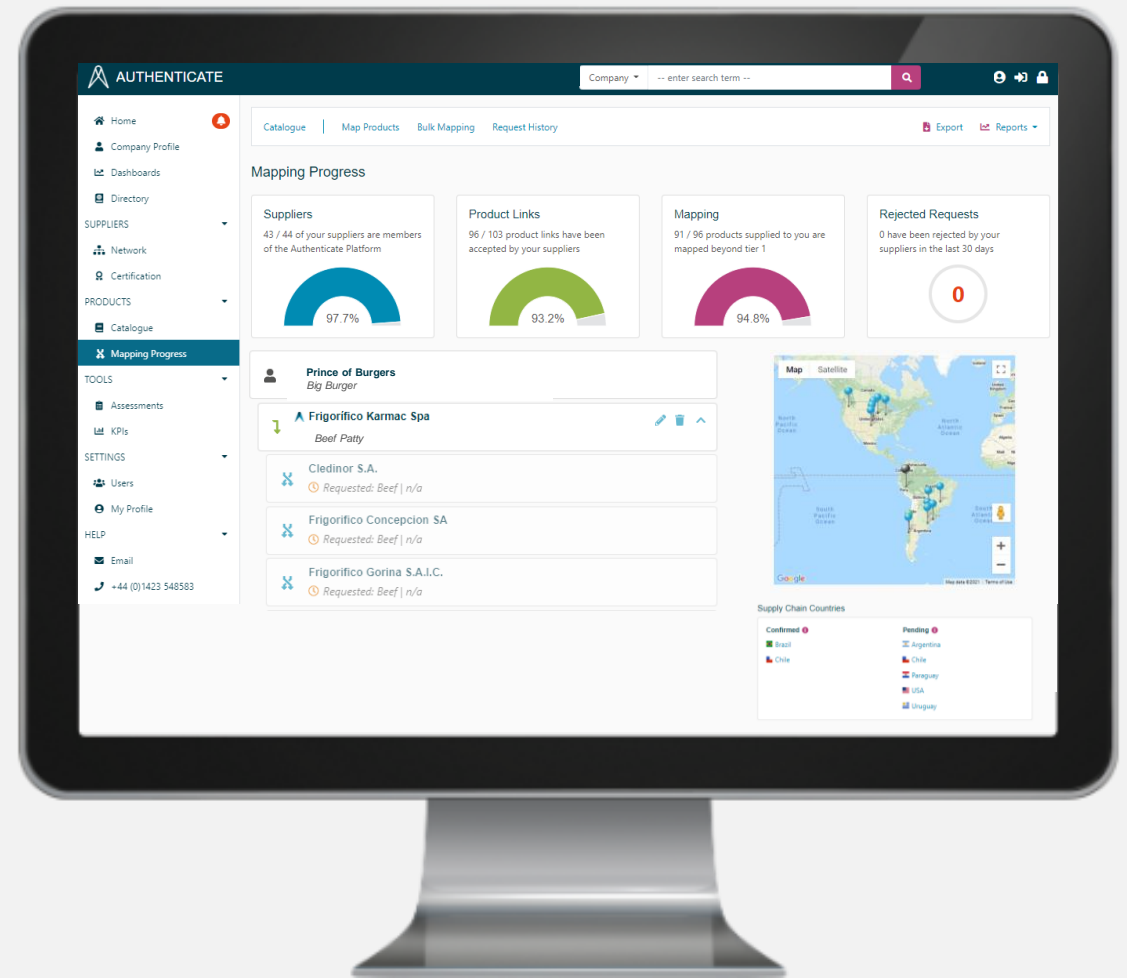

Supply Chain Mapping

Map, monitor and visualise live supply chains across all tiers for complete transparency.

- See direct and indirect suppliers
- Track progress against product link acceptance, supplier platform usage and mapping beyond tier 1
- Filter suppliers by product category, approval status, tier or location
- Add logistics/transport providers for full visibility

With supply chain mapping, a retailer was able to identify where suppliers sit at multiple tiers. Changing sourcing strategy to work with direct suppliers saved **£1,000's**.

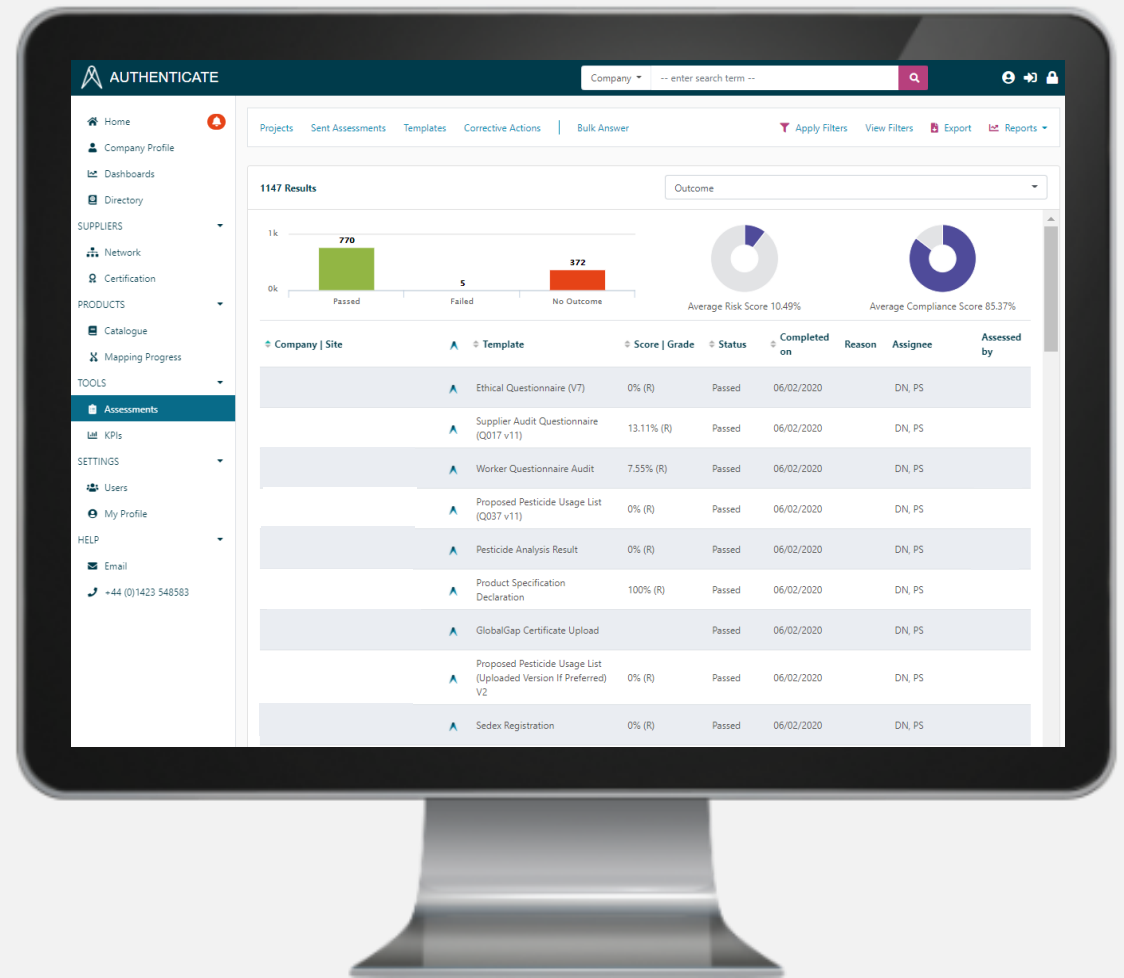

Audits & Assessments

Create custom digital surveys to monitor compliance, manage risk and benchmark suppliers.

- Create audit projects
- Build custom assessment templates
- Send assessments to defined supplier lists
- Benchmark responses against custom risk scores and frameworks
- Manage corrective actions

By moving **90%** of auditing activity from physical to digital, two customers were able to restructure and reduce internal resource.

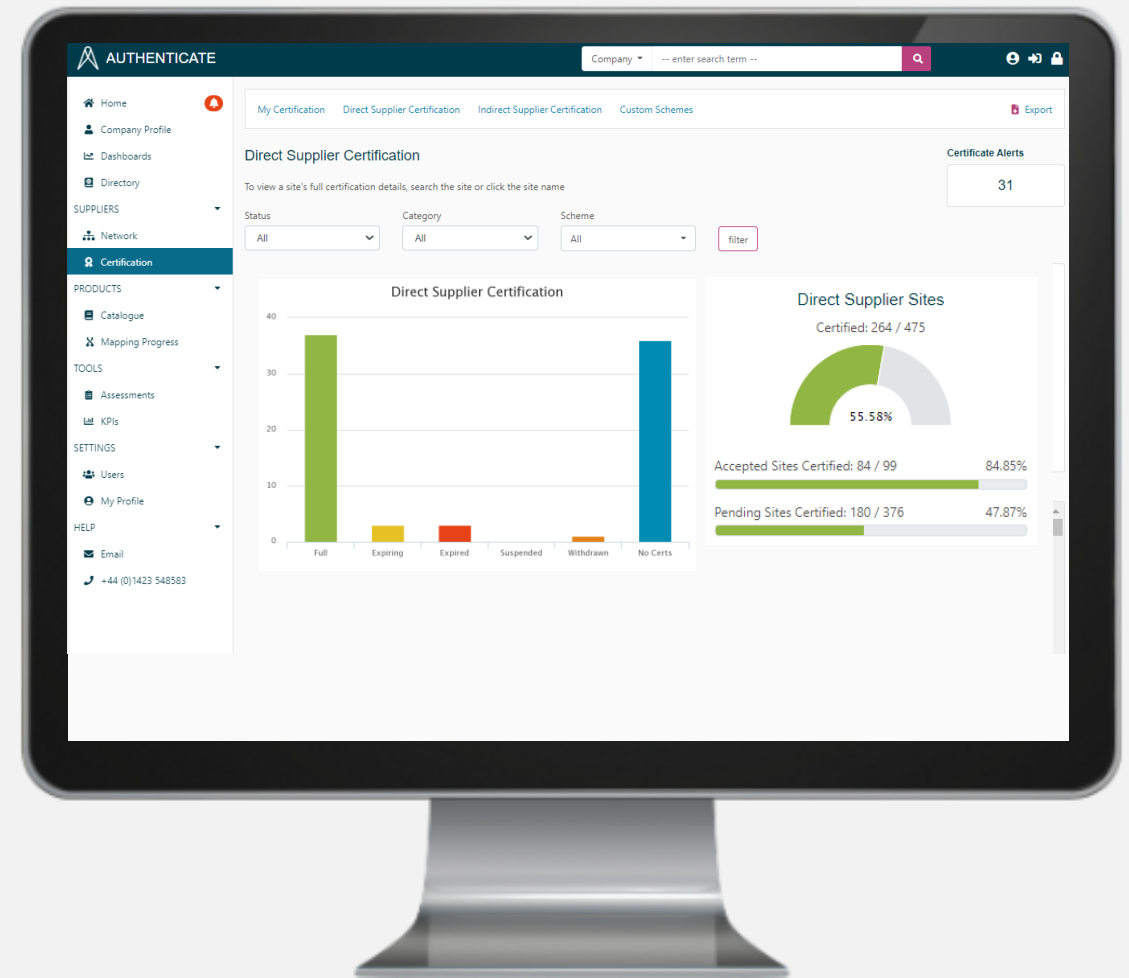

Certifications

Track live supplier certification status against key schemes.

- See dynamic certification summary
- Filter by status, product category or scheme
- Automated and manual schemes include:

Save hours of admin time each week, proven to equate to **~£1,500** annually.

Product Specifications

Build, manage and share complex product details across supply chains to streamline processes.

- Create product specification templates
- Request product details from suppliers covering ingredients, allergens, nutrition, packaging, product claim, storage and so much more

Component *	Final Product (%)	Country of Origin
Vegetable stock	9.2 %	England, Scotland, Northern Ireland, Wales
Water	28.65 %	England, Scotland, Northern Ireland, Wales
Sweetcorn	19 %	Spain, Poland, Hungary
Carrots	9 %	Spain, England, Scotland, Northern Ireland, Wales
Sweet Potato	8 %	Spain
White onion	6 %	China, England, Scotland, Poland, Northern Ireland, Turkey, Wales
Red peppers	5 %	China, Spain, Turkey
Leeks	2.5 %	Belgium, Poland, Turkey
Spring Onions	2 %	China
Red quinoa	2 %	Peru, Bolivia
Coconut Cream 24% Fat	2 %	Indonesia
Tomato Paste	2 %	Argentina, Spain, Greece, USA
Lime Juice Single Strength	0.95 %	Mexico
Cornflour	0.9 %	Thailand
Garlic nuggets	0.75 %	China
Rapeseed oil	0.7 %	France, Hungary, Germany
Ground Coriander	0.2 %	India, Romania, Russia, Bulgaria
Chopped Coriander	0.2 %	Belgium, Netherlands
Smoked Paprika	0.25 %	China, Spain, Peru

 **HELLO FRESH** saved over **60 hours** admin time per week by automating specifications for **350 suppliers**.

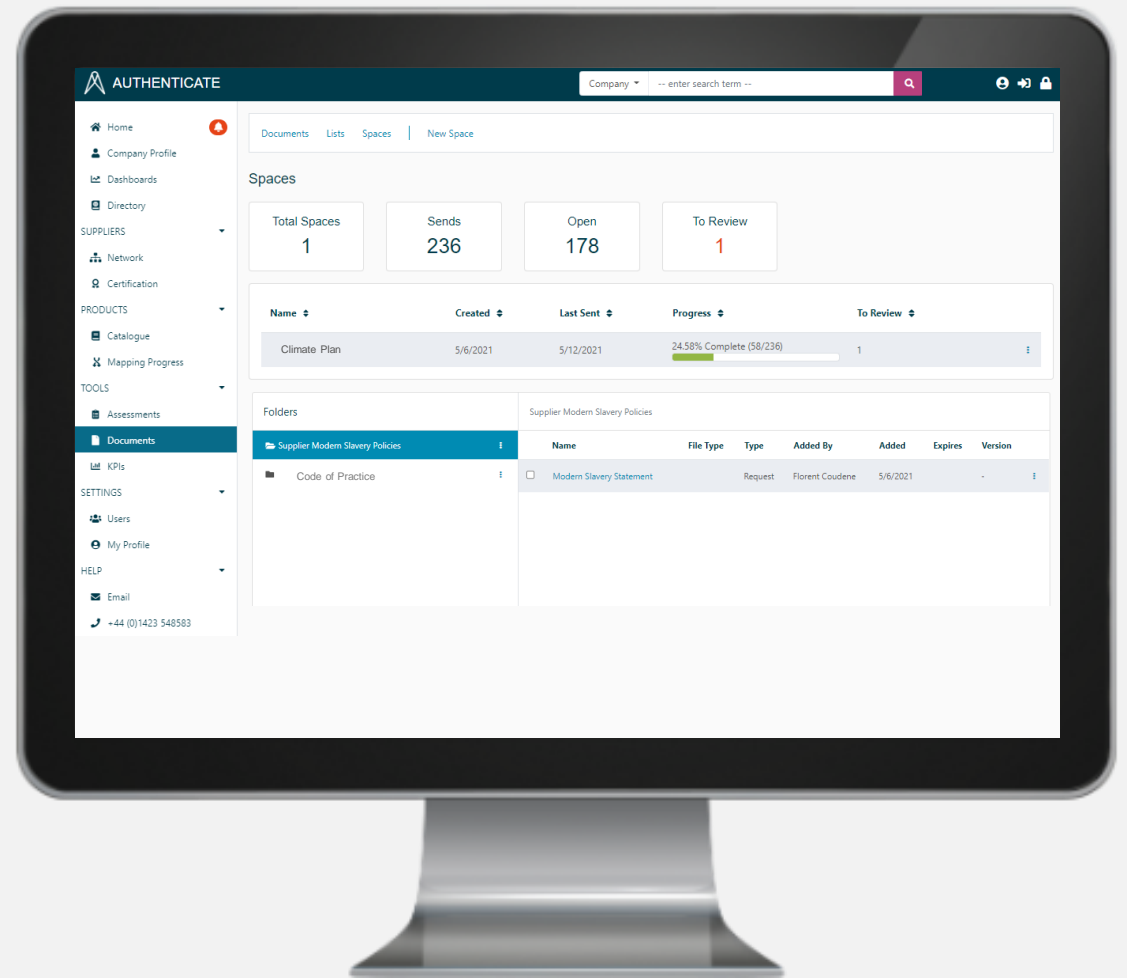

Document Management

Centrally store, share, organise and manage critical documentation, with supplier and internal teams.

- Create tailored folders to group documents
- Define distribution lists to share critical documentation with relevant suppliers
- Monitor opens and approvals

By digitising the paper trail, depending on the volume of documentation, businesses save **5 – 10 hours a week** of admin.

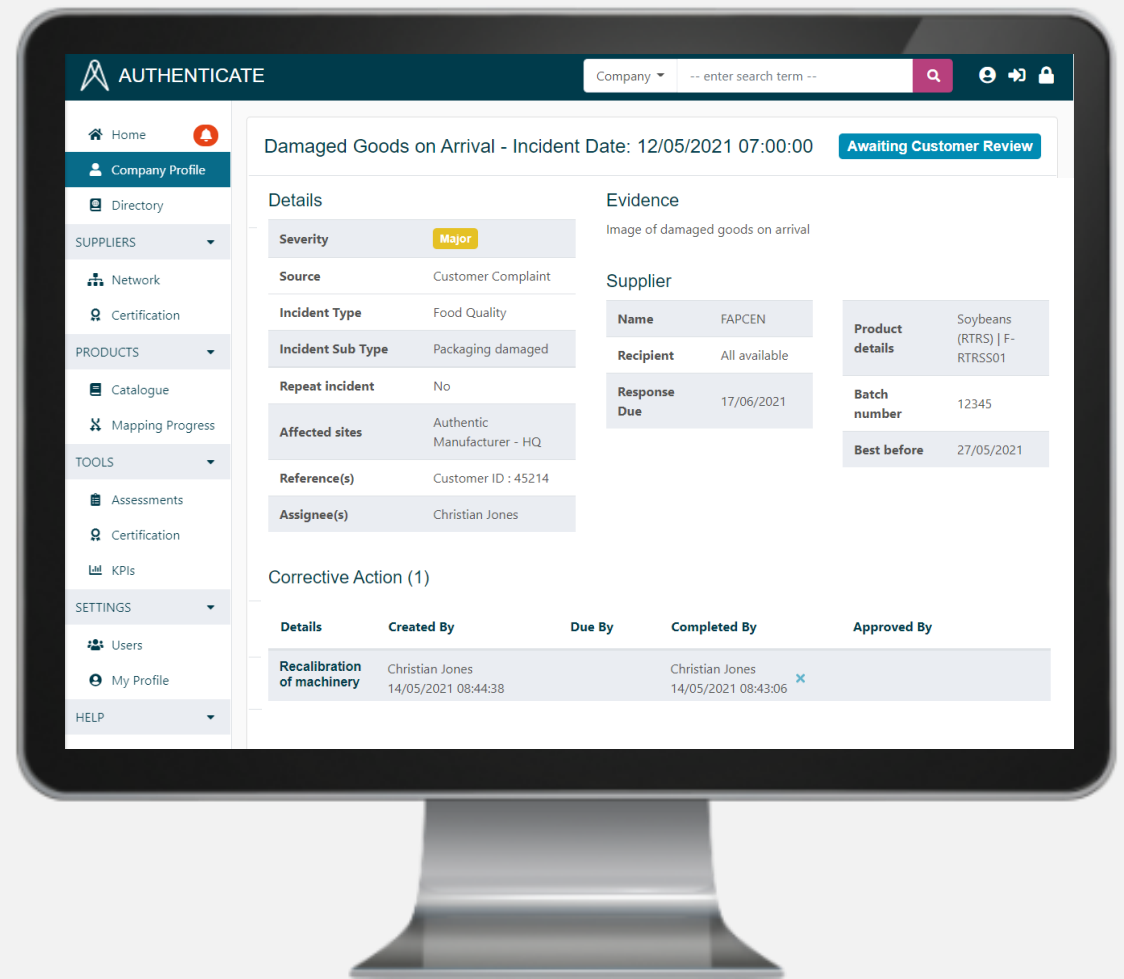

Incident Management

Collaboratively raise, monitor and resolve critical events across supply chains to prevent future issues.

- Create auditable and dated incident events
- Assign severity, type, affected sites and more
- Work with affected supplier to manage, suggest and track corrective and preventative actions
- Identify root cause analysis

Leading food waste fighting box has streamlined its non-conformance processes to improve incident visibility and reporting.

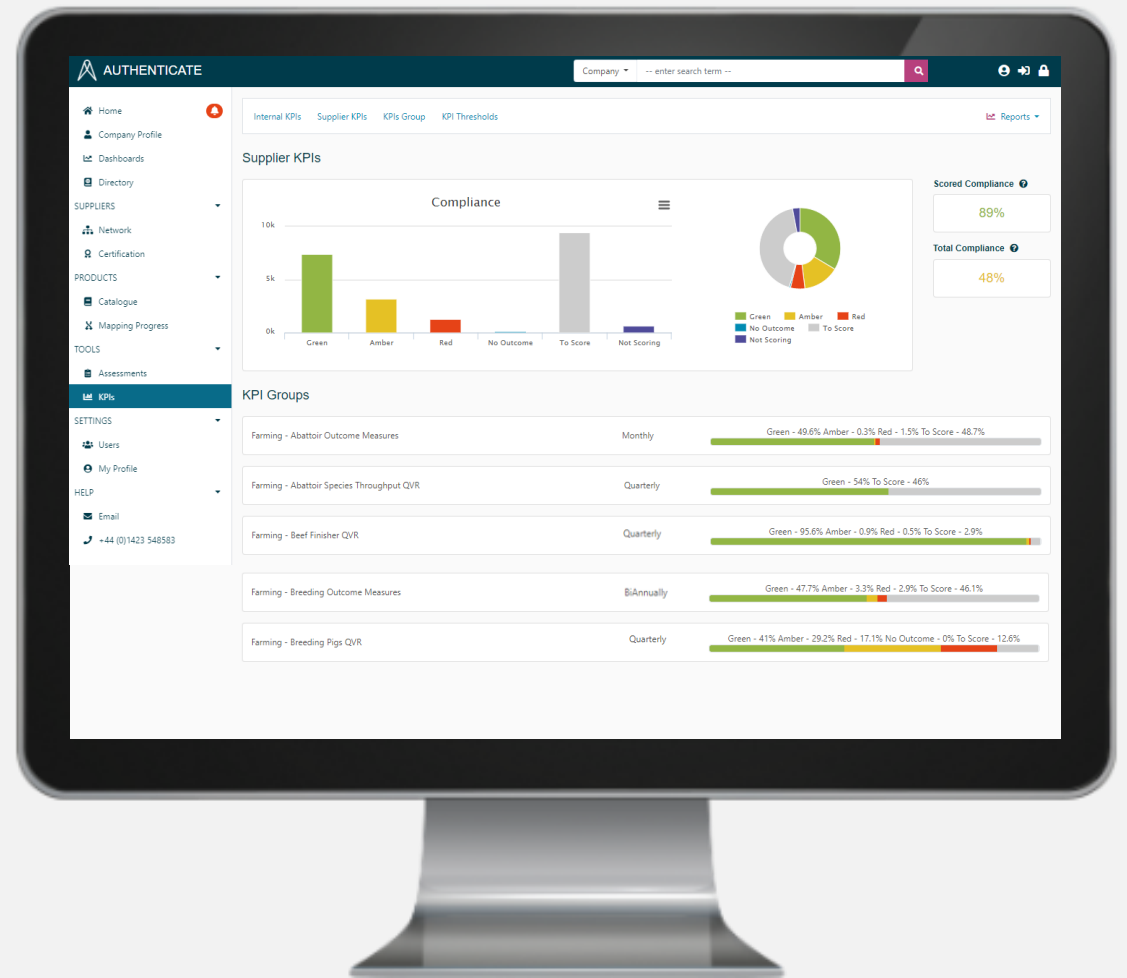

KPIs

Manage and score supplier performance over time against key, custom metrics.

- Track performance against internal and supplier KPIs
- Determine frequency of reporting
- Create acceptable thresholds to assist with compliance scoring
- Generate tailored reports, by supplier, date period and much more.

By collating performance data and automating reporting, businesses can save **4 hours** of review time per supplier. 250 suppliers = 1000 hour saving!

Dashboards

Transform live data into actionable insight to inform decision-making

- Standard and customised dashboards available
- Drill down and extract the information that matters most, whenever you need it
- Filter and focus insight by supplier relationship, tier, country, project and so much more

Using data presented in dashboards, a supplier was able to win business by demonstrating a huge reduction in 'product mileage.'

ESG Maturity Assessment

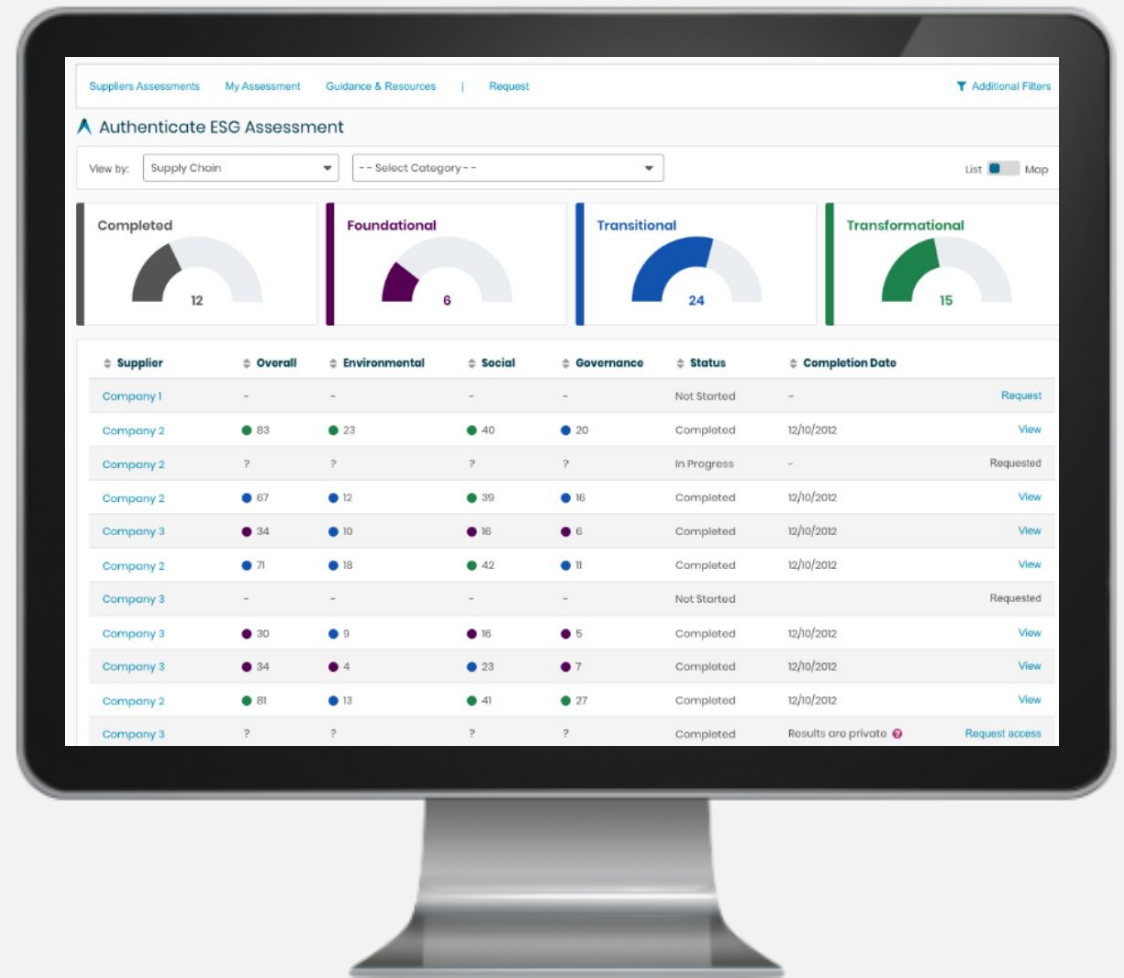

Understand internal & supplier ESG performance with our standardised assessment

- Developed in partnership with global sustainability consultancy Anthesis
- See company or supplier scores/maturity level against critical ESG issues and overall to drive collaboration and improvements
- Simple 60 question format covering a range of topics from biodiversity and emissions to labour practices and policies

CH
& CO

38%

of leading catering company's total supplier spend now represented in ESG data.

Customer Testimonials

"Housing all data, supplier requests and changes in one central place has helped to drive efficiencies as we expand supply chain networks and launch in international markets."

**HELLO
FRESH**

"Authenticate has helped us to continuously assure our supply chains for quality and integrity through transparency. The platform design is modern, slick and user-friendly."

Nomad Foods

"At a time when transparency is essential for any sourcing department, the Authenticate platform provides a unique level of farm-to-fork visibility for the foodservice sector."
