PRODUCTIVITY // EFFICIENCY // RELIABILITY

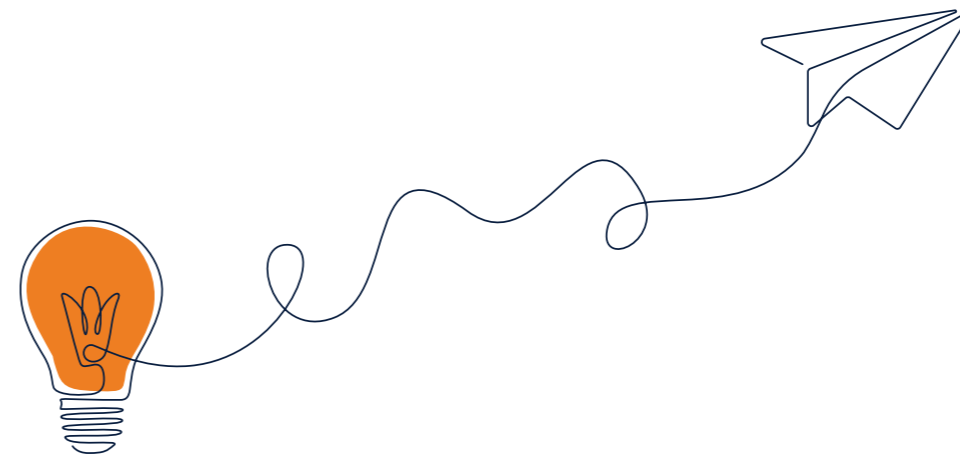

**Nighthawk Software**  
SIMPLIFYING YOUR BUSINESS

---

**// We develop custom software products that help businesses increase productivity, streamline processes, and make their day-to-day operations more efficient.**

**Nighthawk Software is a software development company based in Carlisle, Cumbria.**

We use the latest Microsoft technologies (C# / asp.net core / Microsoft Azure / SQL Server) with a particular focus on web-based development. What's more our solutions run in any web browser, making them available across all devices, including mobiles and tablets.

We can integrate with a wide range of systems to extract production data and make it easily available to you and your customers through professional looking dashboards and portals.

Perhaps you have an idea that would lend itself to a SaaS product, or an idea of how to streamline a process but have no idea how to progress to the next step.

**Whatever you need, we can take your concepts and bring them to life.**

## // Our Mission

**Our mission is to make custom software available to every type of organisation, no matter the size.**

In the past, many have found custom software too expensive and out of reach resulting in them turning to products that are ill-fitting for their set-up, or settling on using Microsoft Excel to keep track of business processes. This may work in the interim for small businesses, but the issue is that this method doesn't scale, resulting in lost revenue and wasted investment.

Enter Nighthawk Software... **whatever the size of your business**, if you are struggling with existing systems that can't scale up or do what you need then **we are here to help!**

Thanks to Nighthawk Software we have replaced our old system which drained hours, was quite flaky, and had corrupted some data the year before. Now we have a modernised solution that ties in with what we want to achieve and offers us a long-term solution.

## // Why choose us?

---

**At Nighthawk Software, we live and breathe software! Our years of experience, combined with our technological knowledge, enables us to build tailored solutions that will empower your business...**

...all while **saving you time and money** and improving customer relationships by harnessing the power of the technological environment.

We track the latest industry trends and combine them with our in-house expertise, enabling us to provide powerful and unique software that fits with the SME sector perfectly.

What's more, once a project is completed, we promise we won't just cut and run – **we stay by your side**, on-hand to assist as your business continues to develop and grow.

So, what are you waiting for? Contact us today to discuss your requirements on **01228 521 477** or email us on **[enquiries@nighthawksoftware.com](mailto:enquiries@nighthawksoftware.com)**.

# // Services

We like to think of ourselves as your tech partners.

Our aim being to simplify your business operations and **increase your productivity**. We take time to understand the way your business works and look for processes that are labour intensive that we can simplify.

**For example:**

- Are you producing invoices manually?
- Is someone spending a Monday morning inputting everyone's weekly timesheets?

We take time-consuming tasks and streamline/automate them, freeing your team up to focus on more productive tasks. We make production data available in real time, so you don't need to wait to take action.

**CONTACT US TODAY:**

Call **01228 521 477** to discuss your requirements and find out how our friendly team can support your business.

**OUR SERVICE OFFERING FOCUSES ON TWO MAIN CATEGORIES:**

**Web Software Development**

Our specialty is to create web-based systems that your employees and customers can access from anywhere, on any device. We work hard to ensure that our products are **user-friendly** and **encourage greater collaboration** between employees in a way that scales and **grows effectively with your business**.

Our bespoke web software service can provide the perfect solution across a wide range of operations such as: Booking / Reservation Systems, Project Management, Invoicing, Timesheets, Manufacturing Reporting, CRM Databases, HR, and a whole lot more.

**Mobile App Development**

Mobile applications offer a unique opportunity to better **engage with your customers** in new ways and this ever-evolving technology is becoming more and more popular with a range of businesses.

Whether you're a café offering table service, a newspaper sharing notifications of breaking news, or a business providing access to customer data for field engineers, the possibilities are endless!

## // Working with us

---

When you work with us, you will be allocated a dedicated project manager who will sit down with you to understand your business and identify areas where we can be of value.

Our aim is to help **increase efficiencies and save our clients money**. For example, if we can save you just five hours a week, that time adds up and quickly thousands of pounds can be saved, meaning that your new software can pay for itself in the first year alone!

## // Our team

---

Our expert team provide a range of solutions from bespoke CRM databases to cloud-based SaaS products, all designed to fit the needs of the end-user.

Small but perfectly formed, our team consists of several **experts in their field** each with a shared focus on delivering user-friendly, efficient systems that improve the operations of our customers' businesses each and every day.

When you work with us, you will be allocated a dedicated project manager who will work with you to **understand your business** and be on-hand to help whenever you need to speak to someone directly.

We want you to **see us as an extension of your own in-house team**, on-hand to support you and provide our expertise as and when you need us.

Our team work closely with our clients providing a service that is not only **efficient** but **friendly** and **professional**.
